Beginner Level - TASK 4

Image to Pencil Sketch with Python:

BY RUBA ROSHINI S

In [8]:

```python
import cv2
import matplotlib.pyplot as plt
```

Read the image in RBG format

In [9]:

```python
image = cv2.imread("bab pic.jpg")
cv2.imshow("Original image of the Plane", image)
cv2.waitKey(0)
```

Out[9]:

-1

Converting the image to GrayScale Image

In [11]:

```python
Grayscale_image = cv2.cvtColor(image, cv2.COLOR_BGR2GRAY)
cv2.imshow("New Plane", Grayscale_image)
cv2.waitKey()
```

Out[11]:

-1

Inversion of the Grayscale image

In [12]:

```python
Inverted_image = 255 - Grayscale_image
cv2.imshow("Inverted GreyScale Plane", Inverted_image)
cv2.waitKey()
```

Out[12]:

-1

Blurring the Inverted Grayscale

```python
blurred = cv2.GaussianBlur(Inverted_image, (51, 51), 0)
cv2.imshow("Blur InvertedGreyscale",blurred)
cv2.waitKey(0)
```

Out[13]:

-1

Inverting the blurred Inverted Grayscale

In [14]:

```python
Inverted_blurred = 255 - blurred
cv2.imshow("Inverting the Blur Inverted Greyscale", Inverted_image)
cv2.waitKey(0)
```

Out[14]:

-1

Create the pencil sketch by mixing the grayscale image with the inverted blurry image.

This can be done by dividing the grayscale image by the inverted blurry image.

In [15]:

```python
pencil_sketch = cv2.divide(Grayscale_image, Inverted_blurred, scale=256)
cv2.imshow("Sketch", pencil_sketch)
cv2.waitKey(0)
```

Out[15]:

-1

Displaying both the original image and the pencil sketch

In [16]:

```python
cv2.imshow("Original Image", image)
cv2.imshow("pencil sketch", pencil_sketch)
cv2.waitKey(0)
```

Out[16]:

-1

THANK YOU
